

# Snowbee® XS-Pro...

## the new dimension in breathable-wader technology

When it comes to breathable waders Snowbee are at the forefront. We have been making and developing waders to our current exceptional standards for longer than most of our competitors

*Now we can provide the latest top-of-the-range breathable waders in a NEW COMBI BOOTFOOT option, in addition to the popular Stockingfoot launched last year*

## Waterproof?... you bet!

- The Riri waterproof zip is the choice of divers in drysuits worldwide and pressure tested to 1.7 bar! Our sales and feedback last year proved it to be the best possible choice
- The main body uses a triple-layer polyester material with a water resistance (hydrostatic pressure) of 20,000mm
- A breathability rating of 3,245g/m<sup>2</sup>/24hr
- The outer surface has been DWR tested to help the fibres resist, and prevent them soaking up, water when in use
- 5-layer laminated material strengthening, in the high-wear areas of the seat and knees, for extra abrasion resistance
- Circular internal seam pad strengthening for multidirectional stress and seam leak protection

If that's not enough - a mid-sole steel shank in the Combi sole prevents torsion and maintains excellent mobility, while providing support and protection to the wearer by adding extra protection from dangerous spikes underwater.

For added comfort and convenience there are also two internal pockets to keep valuables and keys safe and secure.

The popular Combi sole combination for the boot foot (available in sizes 7-13), and of course the full range of our XS-Pro wading boots, are available in various sole options and a full range of sizes for the stockingfoot providing comfort and reliability underfoot too

**At under £200, plus a fuller-bodied version in a range of sizes, you won't find a better value modern zip-fronted, top-of-the-range breathable wader anywhere**
