

Get-a-grip...

XS Pro...

...the choice of the England Rivers Team.

Snowbee® have an established pedigree in wader production spanning nearly 30 years, making us one of the longest running and most prestigious manufacturers today, with a huge leap forward in both quality materials and design in the last couple of years.

The new 2007/8 range has the new XS Pro Zip front breathables, using the very latest in wader design and technology. Constructed from a modern triple laminate Polyester material (doubled in heavy wear areas) they offer no less than 3245g/m²/24hrs breathability with 20,000mm water resistance. Coupled with the very best in Riri waterproof zips (as used for divers dry suits the world over) these will keep you warm, dry and comfortable wherever you are.

The Classic range, are also lightweight and use the Vapour-Tech breathable system. This, combined with the unique PVC stocking foot or popular combi sole boot foot options provides maximum comfort, mobility and true grip for rivers and lakes everywhere.

For the latest in Neoprenes we have GRANITE. These represent only the very best of genuine CR Neoprenes, and the 420 Denier GRANITE Nylon waders have also been made from one of the toughest modern materials available, to help provide for those who need reliable durability, whatever the treatment or applications involved.

Waders

XS Pro Zip-front breathables from £189
